PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 5.5+ years of experience building scalable, high-performance web applications with React.js, TypeScript and Node.js/Express.js, owning features end to end for global enterprise clients including Guardian India Operations and Kone Elevators. Experienced in REST and GraphQL API design, microservices and event-driven architecture, SQL and NoSQL databases, secure authentication and authorization (OAuth/SSO, JWT, RBAC), AWS (Lambda, ECS, SQS, S3), Docker, and automated testing with Playwright and Cypress. Daily user of Claude Code and GitHub Copilot; building AI-integrated apps (LLM APIs, prompt engineering, RAG, tool calling).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend: React.js (Hooks, Context API, React Router), Next.js (SSR/SSG), Ionic React, Code Splitting, Responsive UI Design
State & Data: Redux Toolkit (RTK Query), Redux, React Query
UI Libraries: Tailwind CSS, Material UI, Ant Design, Mantine UI, Chakra UI
Backend & APIs: Node.js, Express.js, NestJS, REST APIs, GraphQL, OpenAPI/Swagger, Postman, API Versioning, Rate Limiting, Microservices, Event-Driven Architecture, Message Queues (AWS SQS)
Security: OAuth 2.0, SSO, JWT Authentication, RBAC, Authorization
Databases: MongoDB, PostgreSQL, MySQL, Redis, DynamoDB
Cloud & DevOps: AWS (Lambda, ECS, SQS, S3, CloudFront, DynamoDB, IAM, CloudWatch), Docker, Kubernetes, Serverless, CI/CD (GitHub Actions); Observability: Logging, Monitoring, Debugging
AI / LLM: AI-Assisted Development (Claude Code, GitHub Copilot), LLM API Integration (Ollama, OpenAI-compatible), Prompt Engineering, Structured Output (JSON + Zod), RAG (basics), Tool/Function Calling
Testing & Tools: Jest, React Testing Library, Playwright, Cypress, Unit & Integration Testing, Git, Jira, Webpack, Babel, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer (Associate IT Consultant) — ITC Infotech, Gurugram *Feb 2024 – Jul 2026*
- Owned and delivered new MERN features for Guardian India Operations' Absence Management system end to end, partnering with cross-functional teams in Agile/Scrum.
- Led performance optimization, resolving complex caching bottlenecks to improve responsiveness and scalability for high-traffic enterprise workflows.
- Built full-stack features for Kone Elevators' Clinica and Planner platforms, including an escalator survey form module for structured data capture and root cause analysis.
- Integrated Salesforce via secure REST APIs to streamline lead management and tendering workflows; designed versioned REST APIs with standardized error handling and webhook-driven, event-based data synchronization.
- Developed and maintained the Site Survey API middleware for Planner, supporting reliable microservices-based data flow and backend integration.
- Used Claude Code and GitHub Copilot extensively in daily development for code generation, refactoring, testing and debugging.

Software Development Engineer (SDE 2) — Yappes Technologies, Mysore *Jun 2023 – Dec 2023*
- Built reusable TypeScript utilities and modular components to improve maintainability across the codebase.
- Implemented encryption/decryption for secure data handling and JWT-based authentication.
- Integrated the Razorpay payment gateway, improving transaction reliability and checkout experience.

Frontend Developer — VisionIndia Software Export Ltd., Pune *Dec 2022 – Apr 2023*
- Built interactive, game-based interfaces, including a Roulette application, with React.js and TypeScript.

Frontend Developer — Torinit Consulting, Pune *Jun 2022 – Nov 2022*
- Engineered 30+ React.js features using Hooks for state management, focused on usability and performance.

Frontend Developer — Ask-Fast Pvt. Ltd., Bangalore *Dec 2021 – May 2022*
- Built secure JWT authentication, including protected route components.
- Implemented lazy loading, improving application performance by 40%.

React JS Developer — Riser Techub Pvt. Ltd., Pune *Oct 2021 – Dec 2021*
- Delivered 30+ user-facing React.js features aligned with business requirements, using Context API for state management.

Software Engineer — Rayabhari Technologies Pvt. Ltd., Bangalore *Jan 2021 – Oct 2021*
- Built front-end applications, including interactive gaming modules, from business requirements.
- Built and maintained an Ionic React Progressive Web App (PWA), including APK builds for local testing.

PROJECTS

AI Assistant Playground *(React, Node.js/Express, Ollama, Zod)* — github.com/prakash855
- Built a full-stack LLM app where Express calls a local Ollama model through an OpenAI-compatible API; the React client keeps conversation history across turns.
- Implemented a prompt-comparison lab, JSON output validated server-side with Zod, a basic RAG flow (keyword retrieval, context injection, grounded answers) and allow-listed tool calling, with rate limiting and input validation.

Note-Taking Application *(MERN Stack, TypeScript)* — e-notes-mine.vercel.app
Full-stack notes app with JWT-secured REST APIs (CRUD, archiving, pinning) and Redux Toolkit state management.

Pencil UI Component Library *(HTML, CSS, JavaScript)* — pencil-ui.netlify.app
Reusable UI component library for rapid front-end development with consistent design patterns.

eBazaar E-commerce Application *(React.js, Context API)* — ebazaar.netlify.app
E-commerce platform with user accounts, dynamic filtering, search, wishlist, and cart management.

EDUCATION

B.Tech, Electronics & Communications — Lovely Professional University (Minor: Web Development) *2018*
