Professional Summary

Senior Full-Stack (MERN) Developer with 5+ years of professional software engineering experience, including extensive hands-on work across Node.js/Express.js backend systems and React.js front-end architecture. Proven track record delivering scalable, event-driven web applications for global enterprise clients, including Guardian India Operations and Kone Elevators. Strong command of state management (Redux Toolkit, RTK Query), microservices architecture, GraphQL, Redis caching, and automated testing (Playwright/Cypress). Adept at translating complex business requirements into high-performance, production-ready applications within Agile/Scrum teams.

Core Competencies

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Ionic React, React Hooks, Context API, React Router, Responsive UI Design

State Management: Redux, Redux Toolkit (RTK), RTK Query, React Query

Backend: Node.js, Express.js, REST API Design, GraphQL, Event-Driven Architecture, Webhooks, JWT Authentication, Microservices

Database & Caching: MongoDB, Redis

UI Libraries: Tailwind CSS, Material UI, Ant Design, Mantine UI, Chakra UI

Cloud & DevOps: AWS (Lambda, S3 etc.), CI/CD, GitHub Actions, Git, Webpack, Babel

Testing & QA: Jest, Playwright, Cypress, Unit Testing, Test Automation

Methodologies: Agile/Scrum, Microservices Architecture, API Versioning

Professional Experience

Associate IT Consultant — ITC Infotech, Gurugram, India *Feb 2024 – Present*

- Delivered enterprise-grade MERN stack features for Guardian India Operations Pvt. Ltd.'s Absence Management system, partnering with cross-functional teams under Agile/Scrum to ship on schedule.
- Led performance optimization initiatives that resolved complex caching bottlenecks, improving system responsiveness and scalability for high-traffic enterprise workflows.
- Contributed full-stack development to Kone Elevators' Clinica and Planner product platforms, delivering business-critical features used across field operations.
- Designed and built an escalator survey form module (Clinica) enabling structured data capture and root-cause analysis for field engineers.
- Integrated external Salesforce systems via secure RESTful APIs, streamlining lead management and tendering workflows end-to-end.
- Architected REST APIs with strict versioning and standardized error handling; implemented webhook-driven, event-based systems to automate real-time data synchronization.
- Developed and maintained Site Survey API middleware for the Planner product, ensuring reliable microservices-based data flow and backend integration.

Software Development Engineer (SDE 2) — Yappes Technologies, Mysore, India *Jun 2023 – Dec 2023*

- Built reusable utilities and modular TypeScript components, improving code reusability and reducing duplication across the codebase.
- Implemented encryption/decryption mechanisms for secure data handling and managed JWT-based authentication flows.
- Integrated the Razorpay payment gateway end-to-end, improving transaction reliability and streamlining the checkout experience.

Frontend Developer — VisionIndia Software Export Ltd., Pune, India *Dec 2022 – Apr 2023*

- Developed interactive, game-based interfaces (including a Roulette application) using React.js and modern TypeScript practices.

Frontend Developer — Torinit Consulting, Pune, India *Jun 2022 – Nov 2022*

- Engineered 30+ front-end features using React.js, with a focus on usability and performance through effective use of React Hooks.

Frontend Developer — Ask-Fast Pvt. Ltd., Bangalore, India *Dec 2021 – May 2022*

- Developed secure authentication systems, including protected route components, using JWT and modern security protocols.
- Implemented lazy loading techniques, achieving a 40% improvement in application load performance.

React JS Developer — Riser Techub Pvt. Ltd., Pune, India *Oct 2021 – Dec 2021*

- Developed interactive applications and UI features using React.js, including Context API for efficient state management.
- Delivered 30+ user-facing features aligned directly with business requirements.

Software Engineer — Rayabhari Technologies Pvt. Ltd., Bangalore, India *Jan 2021 – Oct 2021*

- Developed front-end applications, including interactive gaming modules, translating business requirements into functional UI components.
- Built and maintained a Progressive Web App (PWA) using Ionic React, including packaging APKs from build files for local deployment and testing.

Projects

Note-Taking Application *(MERN Stack, TypeScript)* — https://e-notes-mine.vercel.app/

- Built a scalable full-stack note-taking platform using React, Node.js, Express, MongoDB, and TypeScript.
- Engineered RESTful APIs for CRUD operations, archiving, and pinning features, securing endpoints with JWT-based authentication.
- Implemented Redux Toolkit (RTK) for predictable state management and React Hooks for component logic, ensuring a high-performance, responsive UI.

Component Library (Pencil UI) *(HTML, CSS, JavaScript)* — https://pencil-ui.netlify.app/

- Designed a reusable UI component library enabling rapid front-end development and consistent design patterns across projects.

E-commerce Application (eBazaar) *(React.js, Context API)* — https://ebazaar.netlify.app/

- Built a feature-rich e-commerce platform with secure user accounts, dynamic filtering, search, wishlist, and cart management.

Education

B.Tech in Electronics & Communications — Lovely Professional University *2018*
Minor: Web Development
