

Prakash Agrahari

Senior Frontend Developer | React.js & MERN Full-Stack Engineer

Prayagraj, Uttar Pradesh, India | +91-8559075258 | sshivamprakashh301@gmail.com | linkedin.com/in/prakash-agrahari
| github.com/prakash855 | prakashdev.netlify.app

Professional Summary

Senior Full-Stack (MERN) Developer with 5+ years of experience, including 5.5+ years of Node.js development, building scalable, event-driven web applications. Deep front-end engineering expertise in React.js (React Hooks, Context API) paired with back-end proficiency in Node.js/Express.js, enabling end-to-end full-stack delivery. Skilled in designing responsive, high-performance UI architectures and scalable backend systems using microservices. Strong command of state management with Redux Toolkit (RTK) and RTK Query for optimized API caching and data flow. Delivered business-critical solutions for global clients including Guardian India Operations and Kone Elevators, with hands-on experience in GraphQL, Redis, and automated testing (Playwright/Cypress) to ensure high test coverage.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Ionic React, React Hooks, Context API, React Router
- **State Management:** Redux, Redux Toolkit (RTK), RTK Query, React Query
- **Backend:** Node.js (5.5+ years), Express.js, REST API Design, GraphQL, Event-Driven Systems (Webhooks), JWT Authentication
- **Database:** MongoDB, Redis
- **UI Libraries:** Tailwind CSS, Material UI, Ant Design, Mantine UI, Chakra UI
- **DevOps & Cloud:** AWS (SQS), CI/CD, GitHub Actions, Git, Webpack, Babel
- **Testing:** Jest, Playwright, Cypress, Unit Testing
- **Methodologies:** Agile/Scrum, Microservices Architecture

Professional Experience

Associate IT Consultant

Feb 2024 – Present

ITC Infotech

Gurugram

- Delivered enterprise-level MERN stack solutions for Guardian India Operations Pvt. Ltd., enhancing the Absence Management system with new features under Agile/Scrum methodology.
- Led application performance optimization initiatives, resolving complex caching issues and implementing performance-tuning techniques to improve system efficiency and scalability.
- Contributed full-stack development to Kone Elevators' Clinica and Planner product platforms, delivering business-critical features.
- Designed and built an escalator survey form module (Clinica) to enable structured data capture and root cause analysis.
- Integrated external Salesforce systems via secure RESTful APIs to streamline lead management and tendering workflows.
- Architected REST APIs with strict versioning and standardized error handling; implemented event-driven systems using webhooks to automate real-time data synchronization.
- Developed and maintained Site Survey API middleware for the Planner product, ensuring reliable microservices-based data flow and backend integration.

Software Development Engineer (SDE 2)

Jun 2023 – Dec 2023

Yappes Technologies

Mysore

- Built reusable utilities and modular components in TypeScript to improve code reusability and maintainability across the codebase.
- Implemented encryption and decryption mechanisms for secure data handling and managed JWT-based authentication.
- Integrated the Razorpay payment gateway to enable secure, seamless payment processing, improving transaction reliability and checkout experience.

Frontend Developer

Dec 2022 – Apr 2023

VisionIndia Software Export Ltd.

Pune

- Developed interactive applications, including complex game-based interfaces such as Roulette, using React.js and modern TypeScript practices.

Frontend Developer

Jun 2022 – Nov 2022

Torinit Consulting

Pune

- Engineered 30+ front-end features using React.js, focusing on usability and performance through effective use of React Hooks for state management.

Frontend Developer

Dec 2021 – May 2022

Ask-Fast Pvt. Ltd.

Bangalore

- Developed secure authentication systems, including protected route components, using JWT and modern security protocols.
- Implemented lazy loading techniques, achieving a 40% improvement in application performance.

React JS Developer

Oct 2021 – Dec 2021

Riser Techub Pvt. Ltd.

Pune

- Developed interactive applications and UI features using React.js, including Context API for efficient state management.
- Delivered 30+ user-facing features aligned with business requirements.

Software Engineer

Jan 2021 – Oct 2021

Rayabhari Technologies Pvt. Ltd.

Bangalore

- Developed front-end applications, including interactive gaming modules, translating business requirements into functional UI components.
- Developed and maintained a Progressive Web App (PWA) using Ionic React, including building APKs from build files for local deployment and testing.

Projects

Note-Taking Application (MERN Stack, TypeScript) – [View Project](#)

- Built a scalable full-stack note-taking platform using React, Node.js, Express, MongoDB, and TypeScript.
- Engineered RESTful APIs for CRUD operations, archiving, and pinning features, securing endpoints with JWT-based authentication.
- Implemented Redux Toolkit (RTK) for predictable state management and React Hooks for component logic, ensuring a high-performance, responsive UI.

Component Library (Pencil UI) (HTML, CSS, JavaScript) – [View Project](#)

- Designed a reusable UI component library for rapid front-end development and consistent design patterns.

E-commerce Application (eBazaar) (React.js, Context API) – [View Project](#)

- Built a feature-rich e-commerce platform with secure user accounts, dynamic filtering, search, wishlist, and cart management.

Education

B.Tech in Electronics & Communications

2018

Lovely Professional University

- Minor: Web Development
